

TREKKING IN STYLE WITH THE KASBAH DU TOUBKAL

DISCOVER LTD AND KASBAH DU TOUBKAL TREKKING LODGE

THE BUILDING OF THE KASBAH has allowed people to stay in Imlil without foregoing the creature comforts that we increasingly take for granted and enjoy all the more after being out in the fresh mountain air. Until now, trekking further out and staying overnight in the Toubkal Massif has meant either camping or staying in a local house/gite which, whilst a wonderful experience, is not for everyone.

The first of The Toubkal Lodges has been built in the village of Id Issa in the Azzaden valley and is a half/full days trek (depending on the route) from the Kasbah du Toubkal. The valley of Azzaden is truly spectacular and very traditional. The Lodge is very comfortable offering similar levels of facilities to the Kasbah's Garden House and now allows guests to stay right in the heart of the spectacular Atlas Mountain without having to compromise on accommodation. Its architectural style is such that it complements the environment of the surrounding villages which welcomes its presence in their valley.

In keeping with our sustainable standards, we formed a Village Association that carries out Community projects in the area. Many local villagers were involved during the building of this lodge and it is a welcomed development in the valley.

Whilst the majority of guests will hike in/out of the valley, the lodge can also be reached by an 18km dirt road so it can still be a very special hideaway

for those not wishing to trek in/out but who wish to stay for a few days, relax and do shorter walks in the surrounding area. Options include a range of treks and circular routes using The Toubkal Lodge either as a stopover or as a base for day hikes. It is also possible (by special arrangement) to use mountain bikes or horses to access this wonderfully peaceful and beautiful location. We look forward to welcoming you.

Amenities at Toubkal Lodge in Azzaden

- Four en-suite bedrooms with spectacular views.
- Traditional wooden ceilings, wooden carved doors and other traditional features.
- Under floor heating.
- Spectacular terrace looking up to the snow capped peaks of the Toubkal Massif.
- Lounge with picture windows and wood burning stove.
